Educational Background
- Technology Degree in Systems Analysis and Development - Jorge Amado University Centre - Completed in 2013

Summary of Technical Skills
- Preferential Languages: Java, JavaScript, TypeScript.
- Frameworks: JQuery, JSF, Primefaces, Spring Web, Spring JDBC, EJB, JPA, PrettyFaces, Hibernate, JUnit, Bootstrap, AngularJS, Angular.
- Platforms: Java (Java SE and Enterprise Edition).
- Servers: WebSphere, Jboss, Apache, Tomcat, IIS.
- Cloud: Azure Kubernetes Service, Google Kubernetes Engine, Mongo Atlas
- VCS: SVN, Git.
- Database: PostgreSQL, Oracle, SQL Server, MySQL, MongoDB.
- Others: Docker, Istio, Grafana, Prometheus, ProtoBuf, Cosmos, Prometheus, Grafana.

Professional Experience

Assure Hedge - Full-Stack Developer (July 2018 to now)
- Create Foreign exchange rates API using NodeJS and Mongodb API(Cosmos).
- Create Microservices using NodeJS and Mongodb API(Cosmos)
- Create internal systems and website version using Angular (6,7) and bootstrap.
- Kubernetes configuration and maintenance on Azure and GCloud.
- Monitoring Services with Prometheus and Grafana.

Connectors (Orcawise) - Full-Stack Developer, User interface (May 2016 to May 2018)
- Migration from legacy in Java to MicroServices Architecture with C#, MongoDB, EventStore.
- Create NodeJS Crawlers.
- Rest Development using Java Enterprise Edition, Spring, Hibernate, JPA.
- FrontEnd Developer with AngularJs, Jquery, AJax and bootstrap, C# MVC .Net.
- Optimizing procedures Sql Server.
- Continuous integration Jenkins.

Connectors - Full-Stack Developer(Part-Time) (March 2015 to May 2016)
- Rest Development using Java Enterprise Edition, Spring, Hibernate, JDBI.

- FrontEnd Developer with AngularJs, Jquery, AJax and bootstrap.
- Optimizing procedures Sql Server.
- Continuous integration Jenkins

BRQ - Systems Analyst (September 2014 to February 2015)
- Web Systems Development using Java Enterprise Edition with Websphere.
- Encoding Systems Spring, JSF and JPA.
- Development unit testing with JUnit.
- Systems development using Oracle database.
- Agile software development

Solutis Technologies - Systems Analyst (February 2013 to September 2014)
- Web Systems Development using Java Enterprise Edition with JBoss 6.
- Front End Development in Primefaces and Javascript.
- Encoding Systems CDI, JSF and Hibernate.
- Development unit testing with JUnit and Mokito.
- Systems development using Oracle and PostgreSQL databases.
- Use Alfresco for document management with the library CMIS.
- Agile software development
- Continuous integration Jenkins.
- Code quality Sonar.

Var Comercio e Serviços de informática LTDA - Developer (April 2012 to February 2013)
- Initial development of a game using Unity3d and C #.

MDS Tecnologia - Trainee (September 2011 to April 2012)
- Web Systems Development using Php and Flex.

Foco Multimídia - Technician Systems Development (February 2011 to September 2011)
- Support legacy systems using Php and company's Framework own.
- Web Systems Development using Php Framework and company's Framework own.
- Front End Development in Ext JS JavaScript

Secretaria da Segurança Publica (Public Security) - Developer (February 2010 through June 2010)
- Web Systems Development using php and Flex.
